

Bluetti launches two new power stations in Canada

By Mark PavilonsEditor

If you're going off the grid or prepping for an emergency, Bluetti's portable power stations stand ready to silently power your gear for hours ??or even days ??at a time. With the uncertain and unpredictable weather lately, being prepared is no longer a luxury but a necessity. Don't be kept in the dark, but grab one of these potentially life-saving power units for you and your family. Bluetti, a renowned name in the portable power station realm, is set to unveil two innovative models Feb. 1: the [AC2A](#) and [AC200L](#). The Bluetti AC200L Portable Power Station is a beast of a unit, capable of anything task. At its core lies a hefty 2,048Wh Lithium Iron Phosphate (LiFePO?) battery that is safer and lasts longer ? a whopping 10 years with over 3,000 life cycles. Equipped with a robust 2,400W pure sine wave AC inverter that can deliver 3,600 watts in Power Lifting mode, it's ready to take on high-demand appliances and sensitive electronics alike. Typically, the AC200L alone will power a 1,200W coffee maker for 3.8 hours, or you can expand its capacity with extra batteries to last longer. Adding one B230 or two B300 battery packs increases its capacity to 4,096Wh or 8,192Wh, respectively. This unit stands out for its fast charging via wall or solar panels. For those times when you need power in a pinch, the AC200L can reach up to 80% charge in 45 minutes from the wall. Under optimal conditions, its solar recharge completes in approximately 2 hours, perfect for power on the go. The AC200L has 11 outlets to meet different power needs, including a NEMA TT-30 to directly charge your RV's starter battery, and a 48V DC port to charge the house battery when pairing it with the Bluetti D40 DC-DC charger (sold separately). Plus, a 20ms UPS feature will keep your full-size fridge humming for hours during power outages. Since you can control and check battery details via the Bluetti app on your phone, you know when to activate its ECO mode to save power and exactly how long it can last to keep your groceries fresh in the fridge. The small but mighty AC2A weighs in at only 8 pounds. It's so portable that you can carry it with its integrated handle to any campground, beach, or park. It has two AC outlets, two USB-A ports, a 100W USB-C port, and a 12V car outlet. You can use this 300W power beast (600W surge) to inflate an air mattress and charge a slew of devices. It can power a 60W mini fridge for 2.3 hours, a 50W laptop for 2.7 hours, or a 20W Bluetooth speaker for 5.5 hours. To extend its runtime for heavy use, you can connect it to expansion batteries such as B80 (806Wh), B230 (2,048Wh), B300 (3072Wh) in Power Bank mode. The AC2A recharges rapidly to save you waiting time. With 270W AC Turbo charging, it takes only 45 minutes to go from empty to 80% charge. And the AC2A supports 200W of solar power for a full charge in 1.5 hours. Plus, the AC2A is currently Bluetti's smallest power station with a 20ms UPS function for emergency backup. The company's products are must for everyone ??homeowners, cottage owners, campers and outdoor enthusiasts alike. For emergencies and peace of mind, they are really worth the price. They're simply to operate and they perform flawlessly. Both units will be available for purchase from the official Bluetti website and Amazon from Feb. 1. Bluetti has been committed to promoting sustainability and green energy solutions since its inception. By offering eco-friendly energy storage solutions for both indoor and outdoor use, Bluetti aims to provide exceptional experiences for our homes while also contributing to a sustainable future for our

planet. This commitment to sustainable energy has helped Bluetti expand its reach to over 100 countries and gain the trust of millions of customers worldwide.
